### **City to Start Construction on Parking Lot Projects**

**Morro Bay, California** – The City of Morro Bay will commence construction work for the Morro Bay Parking Lot Rehabilitation project in the first week of April. Ramsey Asphalt Construction Corp., having submitted the most competitive bid of \$236,788.62 from among six contenders, was awarded the contract by City Council on January 11, 2024. A Notice to Proceed was issued by the City for March 29, 2024, and the contractor is required to complete the work barring any extensions within 60 working days. The anticipated end date is June 25, 2024.

The project addresses the deteriorating asphalt concrete surfaces and accessibility deficiencies seen in Lila Keiser Park and safety issues of the Police Department's parking lot. The contractor will perform extensive asphalt removal and replacement, concrete installations, and placement of new pavement markings and striping.

Lila Keiser Park will remain open during construction activities. Although there may be moments during construction when the parking lot accessibility is temporarily affected, measures have been put in place to ensure that field use remains uninterrupted. This careful planning reflects the City's commitment to maintaining community recreational activities while undergoing necessary infrastructure improvements.

The enhancement of the Lila Keiser Park and the Police parking lot will not only improve the City's aesthetic appeal but will also ensure modern accessibility and safety standards are met in public spaces. Such efforts underscore the City of Morro Bay's dedication to an inclusive and safe environment for community members and visitors.

For detailed information regarding the project timeline and any updates on the construction's impact on local traffic or park access, residents and park-goers are encouraged to visit the City of Morro Bay's website or reach out to the Public Works Department directly.
