

New Trash/Recycle/Planter Container Located at Anchor Park

Check out the prototype for replacing various garbage and recycling containers in the waterfront and downtown areas.

What do you think about the new design? Like it? Don't like it? Let us know your thoughts.

Send your comments to Carlos Mendoza at cmendoza@morrobayca.gov

Key Features:

- Locally Handcrafted: Manufactured and purchased in San Luis Obispo County.
- Morro Bay in Bloom has committed to maintaining the planter.
- Replacement parts can be obtained locally. The planter tray is removable.
- Takes up the same footprint as current trash and recycle containers.
- More recycling capacity than the current recycle can.
- Powder-coated metal frame, stainless steel fasteners, weather and termite-resistant exterior.
- Prototype has two options for the exterior. Apitong wood (front and sides) and Trex (back). Apitong has a rich red wood color but requires regular maintenance to keep the look (sand and apply finish).
